

KCRHA All Population Active Methodology

This methodology identifies individuals who are actively experiencing homelessness and who are housed in our HMIS. It underpins analytic and operational data products, ranging from individual level By-Name-Lists (BNLs) to system level analyses that show how populations flow in and out of our homeless crisis response system over time.

The methodology is events-based. It compiles a person-level timeline of events in HMIS from program enrollments, current living situation forms, services, program attendance, exits, and coordinated entry referrals. Each event is categorized as an indication of a client's status as **Homeless**, **Housed**, **Deceased**, or **Continued Engagement**. For homeless events, the methodology further identifies whether the event indicates whether the client is **Unsheltered**, **Sheltered**, or **Temporarily Housed** (or **Unknown**, when shelter status cannot be determined). This timeline allows us to determine an individual's homelessness status on a given day. Users can define the number of days to 'look back' in the timeline for activity before someone is considered inactive in our system.

Homeless Events Criteria

- Fleeing from domestic violence (collected at project entry) indicates a homeless event, along with prior living situation data determine shelter status:

Unsheltered events

- Entry date into Street Outreach program
- From all project types: Exit destination, prior living situation, and/or current living situation in:
 - *Place not meant for habitation...*
- Any service recorded under Outreach program
- Still enrolled in a PH program (PSH, PH-Housing Only, PH-Housing with Services, or RRH) before move-in, with a Prior Living Situation indicating unsheltered

Sheltered events

- Currently enrolled in Emergency Shelter or Safe Haven
- From all project types: Exit destination, prior living situation, and/or current living situation in:
 - *Safe Haven*
 - *Emergency shelter...*
- Recorded bed night service in an Emergency Shelter Night-By-Night program
- Any service recorded under an Emergency Shelter or Safe Haven program
- Ongoing enrollments in entry/exit emergency shelter or safe haven

- Exit from Emergency Shelter, Emergency Shelter Night-By-Night, Transitional Housing, Street Outreach, or Safe Haven to an institutional destination (jail/prison, hospital, psychiatric facility, substance abuse treatment/detox, long-term care, or foster care) — the client remains counted as homeless (sheltered) for up to 90 days following the exit; the buffer is applied downstream in episode construction, not on the event itself

Temporarily housed events

- Currently enrolled in Transitional Housing (report run date)
- From all project types: Exit destination, prior living situation, and/or current living situation in:
 - *Staying or living with friends or family (temporary tenure is only an option for exit destination)*
 - *Moved from one HOPWA funded project to HOPWA TH'*
 - *Transitional housing for homeless persons (including homeless youth)*
 - *Residential project or halfway house with no homeless criteria*
 - *Host Home (non-crisis)*
- Any service recorded under TH program
- Ongoing enrollments in transitional housing

CE housing referral events

- A referral generated through the CEA Queue Assessment to a specific PSH, RRH, TH, or PH-Housing (Only / with Services) program indicates the client was literally homeless on the referral date, since referral to housing implies a Coordinated Entry determination of literal homelessness. These records are HoH-only — household members do not receive their own CE referral records. Shelter status is left blank, since a referral alone does not indicate where the person is sleeping.

Unknown shelter events

- Any service with 'outreach' in the name for a Rapid Re-Housing (RRH) program before a move-in date. (Note: this classification currently only applies to RRH; equivalent pre-move-in outreach services in PSH, PH-Housing Only, or PH-Housing with Services do not currently receive a shelter status.)
- Exits from a homeless program to an unknown destination

Note: Enrollment into Emergency Shelter, Transitional Housing, or Safe Haven is currently classified as Sheltered or Temporarily Housed based on project type alone, regardless of whether the Prior Living Situation is unknown/missing. An enrollment-level "Unknown" shelter status for these project types is not currently produced by the pipeline.

Continued Engagement Events Criteria

- Any attendance date recorded under a Street Outreach, Services Only, or Day Shelter program.
- Attendance shows the client was in contact with a program that day, but it does not confirm that they were homeless or where they slept. Shelter status is Unknown.
- A Continued Engagement event can extend an active period of homelessness if it falls within the look-back window of the most recent event in that period, but it can never start one. Continued Engagement events that fall outside an active period are ignored.

Housed Events Criteria

- Open enrollments with a move-in-date to a housing program:
 - PH – Permanent Supportive Housing (disability required for entry)
 - PH – Housing Only
 - PH – Housing with Services (no disability required for entry)
 - PH – Rapid Re-Housing
- Enrolled in prevention program
- Exit destination, prior living situation, and/or current living situation in:
 - Moved from one HOPWA funded project to HOPWA PH
 - Rental by client...
 - Owned by client...
 - Staying or living with family or friends, permanent tenure (Only available for exits)
- Any service with the following keywords (not case sensitive):
 - Rental assistance
 - Eviction prevention
 - Security deposit

Deceased Criteria

- Exit destination is 'Deceased'
- If new events appear after the deceased event, the death record is considered erroneous and removed from the timeline. Open program enrollments overlapping the death event are not considered new events and do not impact deceased status.

Overlapping Status

If there is more than one event on the same day for a person, the methodology will prioritize in this order:

1. Deceased

2. Housed
3. Homeless
4. Continued Engagement
5. Unknown

Eligibility for CE

Status: planned / not yet implemented. The following describes the intended eligibility logic for Coordinated Entry; it is not currently produced as a computed flag anywhere in the data pipeline.

- Actively experiencing homelessness in the past (90 number of days)
- Has HTT
- Has an open CESP enrollment

Note: assessment data are not used as events in constructing someone's timeline interacting with the homeless crisis response system. Assessments in our system do not require a housed or homeless status for completion and therefore are not definitive indicating someone's active status. Providers should use the Current Living Situation Form whenever adding or updating an assessment to declare a client's homelessness status.
